

# TA 2 and the BFG Project

TA 2 in conjunction with the P & C have been working towards getting the BFG (Big Friendly Garden) up and running for 2017. The project started as we began our Science unit focusing on living and non-living things. We began by searching the school to find worms to create a worm farm and begin composting our scraps.

Then with a little help from the school community we cleared out over ten bags of green waste and old reticulation to make way for new reticulation that would be connected to both the rainwater tank and running water for the warmer months. We were fortunate enough to receive donated services from Total Eden, Bunnings Balcatta and AAA Landscaping.

We have since planted seedlings in 5 of the garden beds and we are looking forward to their growth as we head into the warmer months.

We then attended the Bunnings Warehouse to further our knowledge on sustainability and how to care for the BFG. The excursion was a great success and we were excited to have the EC 2 Pre-Primary students accompany us as they have been helping with the planting and care of the garden.

- Our aim is to grow fresh herbs and vegetables to make pizzas and salad at the end of the year. We hope to share our crop with the other classes and wider community!
